

Francisco Fabian

Unreal Engine C++ Programmer

francisco.fabian.dev@gmail.com | +51942075333 | Lima, Perú | Portfolio | GitHub | LinkedIn

Profile

Unreal Engine C++ programmer with 5+ years of experience building gameplay systems. Skilled at investigating complex engine issues and delivering practical solutions, with hands-on experience in the Unreal Engine ecosystem working alongside studios worldwide.

Professional Experience

Unreal Engine Programmer, Astral Shores Games 04/2026 - 08/2026

- Implemented critical features for *Puzzles of the World*, a VR puzzle game for Meta Quest 3. Remote
- Reworked the puzzle building system and set up majority of the game's puzzles.
- Rebuilt the main menu with puzzle and location selection.
- Implemented a save system for player progression across levels.

Unreal Engine Programmer, BaboonLab (Epic Games Partner Studio) 09/2024 - 03/2026

- Investigated UE issues across gameplay, UI, input, physics, Niagara, and crashes reported by studios worldwide. Remote
- Analyzed engine behavior using source builds, debugging tools, and call stack analysis to deliver workarounds and technical guidance.
- Worked directly with Epic engineers via Slack to file reports and escalate issues.

Game Programmer, Nimble Giant Entertainment (Epic Games Partner Studio) 10/2024 - 04/2025

- Debugged server crashes and hangs in the Fortnite ecosystem, working closely with Epic engineers to identify root causes. Remote
- Analyzed UE and Fortnite codebase behavior to support production stability by performing bugfixing using C++ and Verse.
- Set up and maintained local Fortnite development environments connected to backend services for testing and validation.

Game Programmer, ROKiT Games 09/2022 - 09/2024

- Sole programmer on a small team, building UE5 prototypes across horror, platformer and puzzle genres alongside a team of artists. US (Remote)
- Implemented gameplay systems, UI, AI behaviors and plugin-based tools in C++.
- Supported the 3D art team by scripting Blender workflows in Python.

VR Programmer, Proximity 07/2023 - 04/2024

- Developed VR training simulations for clients in the energy and mining industries across Peru and Brazil. Lima, Perú
- Implemented gameplay systems, UI features and lighting in UE5 and C++.

- | | |
|--|-------------------|
| Unreal Engine Developer, Grupo Avatar  | 01/2021 - 07/2022 |
| <ul style="list-style-type: none"> Developed key features for <i>Real Life Learning</i>, a VR power plant training application for energy sector operators. Contributed to gameplay systems, UI interactions and the tutorial sequence. | Lima, Perú |
| C/C++ Programmer, Novatronic | 07/2018 - 08/2021 |
| <ul style="list-style-type: none"> Developed and optimized EFT switch applications deployed on Linux servers. Built supporting tools using C/C++, C# and SQL (Oracle and PostgreSQL) with involvement in client meetings and deployment. | Lima, Perú |

Skills

Languages – C++, C, C#, Python, Verse

Engine & Tools – UE5, UE4, Git, Perforce, Jira, Slack, Notion, Visual Studio

UE Expertise – Gameplay Systems, UI/UMG, Blueprints, Physics, Enhanced Input, Save Systems, Engine Source Builds & Debugging

Platforms – PC, Meta Quest, PICO, Linux

Projects

- | | |
|---|---------|
| El Último Viaje  , <i>1st Place - Patrimonio Game Jam 2025</i> | 09/2025 |
| Co-developed an Unreal Engine game for Patrimonio Game Jam 2025, a national competition organized by the Peruvian Ministry of Culture. Awarded 1st place for the project's design, execution, and overall experience. | |
| Light Signal  , <i>Winner of the EPIC Mega Jam 2023 "Speed of Light" Category</i> | 09/2023 |
| Developed a game in 7 days using Unreal Engine, leveraging Nvidia technologies like Raytracing and DLSS. Selected from 500 global entries for its graphical fidelity and performance. | |
| Delta Upamayo Experience  , <i>As a programmer for Proximity</i> | 08/2023 |
| Developed key features such as the core game sequence, 360 video playback, UI video widgets and dynamic level lighting. | |
| Metahuman Assistant  , <i>Freelance Work</i> | 2023 |
| Built a UE5 application featuring a MetaHuman virtual instructor for a medical education client. Implemented TTS/lipsync automation and Pixel Streaming for web platform delivery. | |

Education

- | | |
|--|-------------------|
| Informatics Engineering, Pontificia Universidad Católica del Perú  | 03/2012 - 07/2019 |
| | Lima, Perú |

Languages

Spanish – Native/Bilingual

English – Fluent
