

Francisco Fabian

Unreal Engine C++ Programmer

✉ francisco.fabian.dev@gmail.com ☎ +51942075333 📍 Lima, Perú

🔗 Portfolio 🐙 GitHub 🔗 LinkedIn

Profile

Unreal Engine C++ programmer with 5+ years of experience building gameplay systems, with a strong background in investigating and debugging complex game and engine-level issues, reproducing problems, and delivering practical solutions. Proven experience supporting global teams and motivated by teamwork and the process of building meaningful projects and player experiences.

Professional Experience

BaboonLab 09/2024 - 03/2026 Remote
Unreal Engine Support Engineer (Epic Pro Support Partner)

- Investigated complex Unreal Engine issues across multiple domains, including gameplay, UI, input, physics, Niagara, and crash-related problems reported by studios worldwide.
- Reproduced issues in clean UE projects and analyzed engine behavior using source builds, debugging tools, and call stack analysis to identify root causes.
- Delivered practical workarounds and technical guidance, helping external teams resolve issues efficiently while improving overall system stability.
- Collaborated with Epic engineers through internal communication channels to generate Jira reports and escalate issues.

Nimble Giant Entertainment 10/2024 - 04/2025 Remote
Game Programmer

- Investigated and debugged crashes and hangs affecting Fortnite Creative Islands, working closely with internal teams and Epic engineers to identify root causes and propose solutions.
- Analyzed complex behaviors within UE and Fortnite codebases using C++ and Verbose, supporting stability of production systems.
- Set up and maintained local Fortnite development environments connected to backend services for testing and validation.

ROKiT Games 09/2022 - 09/2024 US (Remote)
Game Programmer

- Designed and implemented gameplay systems and reusable components in Unreal Engine using C++, including UI, AI behaviors, and plugin-based functionality for rapid prototyping.
- Enhanced 3D design team workflow by scripting in Blender (Python) and rendering sequences in UE.

Proximity 2023 - 04/2024 Lima, Perú
VR Programmer

Developed VR gameplay systems in Unreal Engine using C++ for Oculus Rift S and Meta Quest 2, focusing on interaction, performance, and user experience.

Grupo Avatar

01/2021 - 07/2022

Unreal Engine Developer

Lima, Perú

- Developed VR simulation applications in Unreal Engine using C++, contributing to gameplay logic and interactive systems for Oculus Rift S.
- Successfully shipped a VR learning tool for a private power company, enhancing training effectiveness.

Novatronic

07/2018 - 08/2021

C/C++ Programmer

Lima, Perú

- Developed and optimized C/C++ systems and banking applications for Linux servers.
- Created tools in C/C#, SQL (Oracle and PostgreSQL), focusing on performance and data security.
- Analyzed project requirements, conducted client meetings, and managed application testing and deployment.

Education

Informatics Engineering

03/2012 - 07/2019

Pontificia Universidad Católica del Perú 

Lima, Perú

Projects

El Último Viaje

09/2025 - 09/2025

1st Place - Patrimonio Game Jam 2025

Co-developed an Unreal Engine game for Patrimonio Game Jam 2025, a national competition organized by the Peruvian Ministry of Culture. Awarded 1st place for the project's design, execution, and overall experience.

Light Signal

09/2023

Winner of the EPIC Mega Jam 2023 "Speed of Light" Category

- Developed a game in 7 days using Unreal Engine, leveraging Nvidia technologies like Raytracing and DLSS.
- Selected from 500 global entries for its graphical fidelity and performance.

Delta Upamayo Experience

08/2023 - 09/2023

As a developer for Proximity

- Created a VR experience for Activos Mineros using C++ & Blueprints.
- Developed key features such as the core game sequence, 360 video playback, UI video widgets and dynamic level lighting.

Metahuman Assistant

05/2023 - 07/2023

Freelance Unreal Engine Programming

- Programmed a UE5 application with MetaHuman technology, advanced TTS/lipsync automation, and Pixel Streaming.
- Delivered lifelike avatars for a medical field client, ready to integrate with web platform.
